SCIENCE, TECHNOLOGY, INNOVATION AND CAPACITY-BUILDING

Building Capacity in Science and Engineering UNESCO's Natural Sciences Sector works towards strengthening countries' capacities in science and engineering through international cooperation through scientific networks with major region-specific actions.

Building Capacity in Science and Engineering | UNESCO Bangkok

As proposed by Milèn (2001), capacity building is a continuous and dynamic process, builds on what already exists, the construction process has an intrinsic value in itself, allows dealing with continuous changes and is carried out in a holistic or integrated way. It has implications for the medium-long term. It has different levels and for the purpose of the present work the focus is placed at the micro level: individual - science and technology human capacity.

Omar F. Bizri, in Science, Technology, Innovation, and Development in the Arab Countries, 2018. 1.4 Concluding Remarks. Effective capacity building in all the countries of the Arab world calls for a radical paradigm shift emphasizing the needs of much wider segments of society and discarding rentier practices and the ill effects they invariably engender on many fronts.

Capacity Building - an overview | ScienceDirect Topics

Capacity building (or capacity development) is the process by which individuals and organizations obtain, improve, and retain the skills, knowledge, tools, equipment, and other resources needed to do their jobs competently. It allows individuals and organizations to perform at a greater capacity (larger scale, larger audience, larger impact, etc).
