Inventive Thinking

Systematic Inventive Thinking is a thinking method developed in Israel in the mid-1990s. Derived from Genrich Altshuller's TRIZ engineering discipline, SIT is a practical approach to creativity, innovation and problem solving, which has become a well known methodology for innovation. At the heart of SIT's method is one core idea adopted from Genrich Altshuller's TRIZ which is also known as Theory of Inventive Problem Solving: that inventive solutions share common patterns ...

Systematic Inventive Thinking (SIT) is a thinking methodology where creativity takes centre stage. It contains five thinking patterns that humans have used for thousands of years. It directly contradicts the principle of 'thinking outside the box' and uses 'thinking inside the box' as a guiding principle in order to prove that creativity is not the prerogative of only a few.

Systematic Inventive Thinking, a powerful problem solving ...

What is Inventive Thinking? Inventive thinking is originally about inventing innovative products and hi-tech solution, where physical products are invented to solve material problems. This kind of thinking has been found to be useful in solving non-material problems. "Inventive thinking is actually a mind-set of looking at challenges in a positive way," says Aliamat, who has chosen to do his PhD on this topic. "In my research, my focus is about changing students' perspectives, to be ...

Unified Structured Inventive Thinking is a structured, problem-solving methodology for finding innovative solution concepts to engineering-design type problems. Historically, USIT is related to Systematic Inventive Thinking, which originated in Israel and is related to TRIZ, the Russian methodology. It differs from TRIZ in several ways, but most importantly it is a simpler methodology, which makes it quicker to learn and easier to apply. It requires no databases or computer ...
