Pre Christian Ireland From The

Pre-Christian Ireland is a mix of fairy tales and facts. Scholars always struggled to find the reality. The struggle got much harder when they found out the texts are not only influenced by fairy tales but also by the Bible and classical works. Later, archaeological evidence and DNA analyses came to assist them.

Pre-Christian Ireland deals with the archeology of Ireland's prehistoric period up to the coming of Christianity. The author of this book was trying to make a survey of this period taking into account the updated research and finds made of that period up until the time of the printing of the book. This book uses for its main sources archeology, radiocarbon dating and dendrochronology or the science of tree-ring dating. To a certain extent the author achieved his goal.

Pre-Christian Ireland 2000 BC - 400 AD The pre-Christian people of Ireland are of largely unknown origin, though it is believed they arrived here via Britain, possibly from Germany and Austria, even North Africa. They were not literate and no direct written accounts of this time exist, they passed their tradition down by oral means.

Pre-Christian Ireland 2000 BC - 400 AD

Outside the borders of Ireland itself there are undoubted proofs that the country was recognized as Christian before the time of St Patrick. Already about 350 we find an Irish bishop presiding over the see of Toul, named Mansuetus, or Mansuy, of whom a twelfth-century writer says: Fuit idem venerandus pater, sicut relatu maiorum didicimus, nobili Scotorum genere oriundus .

This book is written by an expert in the field in Irish archeology and it should be read by anyone who wants to know the truth of pre-Christian Ireland. Harbison's descriptions of the ancient artifacts, the tombs, the gold, the jewelry, are excellent for the information he gives on early Irish life. The Irish Bronze Age is particularly interesting. Although maybe not written for a general reader it is a great book to have for accurate and informed reference. I highly recommend it.

This included laws, language and religion. The ancient Irish texts written in early Christian times describe the customs and way of life in Ireland prior to the arrival of Christianity. There was the old law system known as Brehon law, which remained customary in Ireland until the early 1600s. The vernacular language, the Irish language, is still spoken in parts of Ireland today and is an important part of the Irish school curriculum. A fascinating feature of this world was the religion that ...

This is the most comprehensive and compelling reconstruction of pre-Christian Irish religion ever attempted. It lucidly demonstrates that the Cult of the God Dagda-Donn and his Consort, the Goddess Danu-Morrigan, was the very heart of Irish Druidism. If you only consult a single study on this topic, let this be it! This magnum opus is a serious and scholarly antidote to the amateurish drivel peddled by Morgan Daimler and her fellow 'hard polytheists.' Highly recommended!

There's a common misconception that anything happening prior to the year 1 c.e. (common era) is automatically pre-Christian because it occurs prior to the advent of Christianity, while anything taking place after that year is automatically considered post-Christian. This, however, is not the case, particularly when looking at academic or scholarly sources of information.
