Structure-Performance Relationships in Surfactant, Revised ...

In response to intensifying interest on surfactant research brought on by recent innovation, Structure-Performance Relationships in Surfactants, Second Edition examines novel developments in our understanding of the properties and performance of surfactants at air-liquid, liquid-liquid, and solid-liquid interfaces, highlighting seven new chapters and carefully updated material to reflect current trends. This edition presents new material on the adsorption of vesicle-forming surfactants at ...

Structure-Performance Relationships in Surfactants ...

Focuses on the relationships between surfactant structure and performance. The text offers coverage of a range of topics in the field, including theories of micelle formation and adsorption, the dynamics of surfactant solutions, the physicochemical properties of structured surfactant and emulsions, adsorption characteristics, and the preparation of microparticles in reversed micelles.

In this study, the relationships between structures of surfactants and their anti-

hygroscopicity performance in coated AN particles were experimentally investigated by using a fixed coating process condition, based on which some mechanism was conducted by means of analysis of properties of surfactant molecular structures and their possible behaviors in coating processing. The summary of this study as follows:

It is a challenge currently to develop structure-property-performance relationships for surfactant mixtures containing greener reagents to obtain maximum efficiency with minimum environmental damages. Even though conventional surfactants and their mixtures are well studied, the fundamental studies of the structure, property and performance relationships for greener surfactants when used individually or in combination with others are just started as more and more attentions are focusing on ...
