[The Internationalization Of Television In](#)

The Internationalization Of Television In

Traditionally, television has been analysed as a national domestic medium. However, technological, political and regulatory developments in the last two decades have introduced a complexity of new forces which are transforming the medium into an international one. Such forces as supra-national regulatory activity, the international trade in television and the development of transfrontier television are creating new alliances and practices among politicians, broadcasters and media ...

China's television represents a highly complicated communication system, a powerful ideological machine, and a unique social manifestation. As Professor Hong illustrates, during the past 20 years, since the country's reform, television has experienced tremendous changes. While many studies of media globalization attribute the phenomenon mainly to external factors—new technologies, global ...

Télévision et Europe : questions et réponses en questions . By Pierre Moeglin. Cite . BibTex ; Full citation; Abstract. This article offers a critical analysis of the state of television in Europe against the horizon of the new Europe of 1993. It calls into question three assumptions that underpin efforts by the European Community to create an integrated media system. The European media ...
