La classification des voitures de chemin de fer s'appuie sur une norme établie par l'Union Internationale des Chemins de fer (UIC). Chaque voiture est identifiée par un code numérique à 12 chiffres précisant son usage, l'exploitant, ses caractéristiques techniques et le numéro d'ordre de la voiture dans la série.

Classification UIC des voitures de chemin de fer — Wikipédia

The earthworks and trackbed layers for the CTRL have been designed in accordance with the International Union of Railways (UIC) Code 719R together with French TGV best practice. The UIC code recommendations for high speed lines are largely based on extrapolating to higher speeds an empirical and prescriptive approach developed from experience on main lines (i.e. up to 200 km/h). To give more assurance to the extrapolated use of UIC Code 719R for high speed lines, analytical and experimental ...

It is possible to use the UIC (International Union of Railways) code that has been issued with the cooperation of Japan, Germany and France. (The Association of American Railroads, Amtrak, and US Department of Transportation are members of the UIC). However, many US legal and customary practices differ significantly from those given in the UIC standards. Many technical issues can be derived ...

California High-Speed Train Project

The UIC Country Code is a two digit-number identifying countries in which members of the International Union of Railways (UIC) are active. The UIC has issued numbering systems for rolling stock (UIC wagon numbers) and stations that include the country code. The values are defined in UIC leaflet 920-14. The country code had originally been designed as a company code but mainly as a consequence ...
